---	--	--

Code	Description
CC10-01	COXY CUSHION – Seat support Naked Cushion with anti-decubitus properties in 3D material. Weight: 1.050 gr/m ³ Thickness: 10mm

Product Description	Cushion with properties for the prevention of decubitus made of polyester fiber. The high retractility and low compressibility of the material give to the cushion a high elastic force that supports and distributes the weight received in the best possible way, avoiding the crushing of the skin, the slowing of blood circulation and the related consequences during a prolonged sitting session. The high elastic strength and breathability allow to prevent the onset of pressure ulcers.
Intended use	3D fabric cushion realized for the prevention of decubitus during prolonged sitting sessions, even by patients confined to a wheelchair or with limited ability to move. Relieves bone pressure on the most exposed points, improves blood circulation in the tissues, reduces shear and friction forces, promoting air circulation.
Assembly	Coxy Cushion is supplied ready for use. The presence of the non-slip layer on the bottom side allows you to keep the cushion in the right position.

Regulatory references
Disposal: according to Directive 2002/96 / EC on environmental protection. Product subject to separate waste collection. Do not disperse in the environment.

Technical features	
Dimension and weight	CC10-01: cm 40x40 – gr. 212 Thickness: mm. 10
Materials used	Poliester fiber PET 100%

Warnings and contraindications
<p>Check the integrity of the product upon opening. If in doubt about the use of the product, contact the retailer.</p> <p>In use, strictly follow the instructions. The seat cushion is indicated for the prevention of decubitus, but it is not able to control all the factors that favor its onset. It is therefore recommended to regularly monitor the affected area, to carry out frequent mobilization of the patient and to pay particular attention to hygiene.</p> <p>For this purpose, it is advisable to consult the protocols and guidelines for the prevention of pressure sores. No contraindications were found except in cases of ascertained sensitivity to the component materials. GM Savio Srl declines any responsibility for any improper use of the product or for incorrect application.</p>

Warranty
24 months from the date of purchase for manufacturing defects excluding parts subject to wear
